ACKNOWLEDGEMENTS

I am deeply indebted to my Research Supervisor Dr. K. Rosaiah, Professor of Statistics, Acharya Nagarjuna University, for his guidance in taking up this research problem. I have the opportunity of getting an excellent academic intellectual stimulation, inspiring guidance, constructive criticism and helpful suggestions throughout my research investigation from my research director Dr. K. Rosaiah.

I wish to place on record my deep sense of gratitude and indebtedness to Dr. R.R.L. Kantam, Professor of Statistics, Acharya Nagarjuna University for his encouragement and help throughout the period of my research work.

I will never forget the encouragement and suggestions given by my teachers and faculty members of Department of Statistics, Acharya Nagarjuna University - Prof. V.L. Narasimham (Retd. Professor), Prof. C. V. Rao (Retd. Professor), Prof. A.V. Dattatreya Rao, Prof. B. Re. Victor Babu, Prof. K. Chandan, Prof. A. Vasudeva Rao, Prof. G.V.S.R. Anjaneyulu - and all my fellow Researchers for their good wishes throughout this research pursuit.

My specially thanks to Dr. G. Srinivasa Rao, Professor of Statistics, Department of Statistics, School of Mathematical and Computer Sciences, Dilla University, Dilla, Ethiopia, and Dr. B. Srinivasa Rao, Associate Professor, R.V.R & J.C College of Engineering, Guntur have put up all their efforts in computerization of the results of this thesis, support and encouragement.

I thank the Management and Principal, St. Ann's College for Women, Gorantla, Guntur, for permitting me to pursue research work. I thank my associates and friends for their help and encouragement during the entire course of this research work.

I thank the authorities of Acharya Nagarjuna University in providing all necessary facilities to pursue the research work.

I wish to express my personal sentiments, love and affection to my parents, wife, daughters, uncle, sisters and brothers their continual and vocal encouragement for me to finish this research work.

Nagarjunanagar,

March, 2012.

(J. PRATAPA REDDY)

PREFACE

This thesis entitled **“QUALITY CONTROL METHODS AND RELIABILITY ESTIMATION BASED ON INVERSE RAYLEIGH DISTRIBUTION”** submitted for the award of Ph.D in Statistics is carried out by me at the instance of Dr. K. Rosaiah, Professor of Statistics, Acharya Nagarjuna University and is motivated by a desire to study the probability model – Inverse Rayleigh Distribution with reference modeling of data in some live situations in Industry. This is simpler for statistical and mathematical treatment, in view of its analytical expressions.

As the data of quality control and reliability are non negative in nature, probability model of a non negative valued random variable is always desirable and inverse Rayleigh distribution is one such model. We are motivated to model soft failure data, life testing experiment's data, quality control data of variable quality characteristic, by inverse Rayleigh distribution and study the advantages of such modeling. In this context we have made an attempt to investigate probabilistically, the random phenomenon of the situations – number of failures a developed software experienced in a given period of time of testing phase, variable quality measurements of an online production process, sampling inspection plan to decide up on whether or not to accept a produced lot of items on the basis of observed number of failures in a sample from the lot and evaluation of stress-strength reliability in single and multi-component systems with reference to inverse Rayleigh distribution. The findings of our research study are presented in various chapters of this thesis.

Chapter-I is of general introduction in nature along with a survey of relevant literature and the problems traced for our study. In Chapter-II we use inverse Rayleigh distribution to develop ML and Modified ML estimation, reliability estimation and reliability study. Chapter-III contains the application of inverse

Rayleigh distribution in constructing variable control charts useful in statistical quality control along with Analysis of Means (ANOM). In Chapter-IV inverse Rayleigh distribution is used as life time variate to develop variable sampling plans using sample on lifetime data. In Chapter-V – the last chapter, the stress-strength reliability estimation in single component as well as multi-component systems where stress, strength variates are assumed to follow inverse Rayleigh distribution is presented.

The numerical tables computed along with the listings of the computer programs are presented towards the end of respective chapters. The lists of references arranged alphabetically are provided towards the end of the thesis. Reprints of publications out of this research study are appended towards the end of this thesis.

Nagarjunanagar,

March, 2012.

(J. PRATAPA REDDY)

CONTENTS

	Page No.
CHAPTER I: GENERAL INTRODUCTION AND SURVEY OF LITERATURE	1 - 9
1.1 Introduction	1
1.2 Research literature based on inverse Rayleigh distribution	4
1.3 Problems of investigation	8
CHAPTER II: ESTIMATION AND TESTING	10 - 60
2.1 Introduction	10
2.2 ML and modified ML estimation	11
2.3 Reliability estimation	21
2.4 SRGM as non-homogeneous Poisson process	23
CHAPTER III: CONTROL CHARTS FOR VARIABLES	61 - 102
3.1 Introduction	61
3.2 Variable control charts for inverse Rayleigh distribution	63
i) Control charts for Mean	
ii) Control charts for Median	
iii) Control charts for Mid Range	
iv) Control charts for Range	
3.3 Comparative study – Control charts	77
3.4 Analysis of Means (ANOM)	80
3.5 Comparative study – ANOM	84

CHAPTER IV: ACCEPTANCE SAMPLING PLANS

Page No.

103 - 151

4.1 Introduction	103
4.2 Acceptance sampling plans - Averages	110
4.3 Acceptance sampling plans - Percentiles	116
4.4 Comparative study of the sampling plans – Averages and Percentiles	126
4.5 Conclusions	127

CHAPTER V: STRESS-STRENGTH RELIABILITY ESTIMATION

152 - 180

5.1 Introduction	152
5.2 Estimation of stress - strength reliability	157
5.3 Estimation of reliability in multi-component stress-strength model	163
5.4 Simulation study and data analysis	167
5.5 Conclusions	172

REPRINTS OF PUBLICATIONS

**GENERAL INTRODUCTION AND SURVEY OF
LITERATURE**

1.1 Introduction

In reliability and survival studies, many life distributions are characterized by monotonic failure rate. Trayer (1964) introduced the inverse Rayleigh distribution. The probability density function (pdf) and cumulative distribution function (cdf) of standard inverse Rayleigh distribution (IRD), respectively, are given by

$$f(z) = \frac{2}{z^3} \exp\left(-\frac{1}{z^2}\right), \quad z > 0 \quad (1.1.1)$$

$$= 0, \quad z \leq 0$$

$$F(z) = \exp\left(-\frac{1}{z^2}\right), \quad z > 0 \quad (1.1.2)$$

$$= 0, \quad z \leq 0$$

If a scale parameter $\sigma > 0$ is introduced, the pdf and cdf of inverse Rayleigh distribution are respectively, given by

$$f(t; \sigma) = \frac{2\sigma^2}{t^3} \exp(-\sigma^2/t^2), \quad t > 0, \sigma > 0 \quad (1.1.3)$$

$$= 0, \quad t \leq 0$$

$$F(t; \sigma) = \exp(-\sigma^2/t^2), \quad t > 0, \sigma > 0 \quad (1.1.4)$$

$$= 0, \quad t \leq 0$$

The findings of our research study are presented in the form of this book, which are summarized in five chapters. Chapter-1 is of general introduction along with survey of literature on inverse Rayleigh distribution and related distributions. In Chapter-2, ML and Modified ML estimation and reliability estimation of inverse Rayleigh distribution are discussed. In Chapter-3, we constructed the variable control charts along with Analysis of Means (ANOM) for inverse Rayleigh distribution. In Chapter-4, we developed variable sampling plans based on inverse Rayleigh distribution and also illustrated the method using lifetime data. In Chapter-5, we have presented the estimation of stress-strength reliability in single component as well as multi-component systems, where the stress, strength variates are assumed to follow inverse Rayleigh distribution. The numerical tables computed along with the listings of the computer programs are presented towards the end of respective chapters. The references are appended alphabetically at the end of this book.

Prof.K.Rosaiah has completed M.Sc. Statistics in 1982 and got Ph.D. in Statistics in 1990 from Acharya Nagarjuna University, Guntur, India. Joined as Lecturer in the Department of Statistics, Acharya Nagarjuna University in 1985 and promoted as Professor in 2002. Published 64 research articles and also published one text book.
